

I have been trying to change my port for my cell phone beginning on December 2, 2003. As of today, my port is being delayed by AT&T and is not allowing US Cellular to take my phone number. I want my number released immediately. I have tried contacting AT&T myself and was put on hold for an hour and 15 minutes before getting disconnected. I have spoken to US Cellulars portability center and they have seen the problem and believe it is AT&T's fault. I need further action taken on AT&T's end so my number can be released immediately. My cell phone number is 312-420-1436.
